ABOUT THE AUTHOR

As the author, Ankur Gill stands out as a versatile professional, seamlessly integrating comprehensive knowledge in instructional management, academia, and the corporate arena. Accumulating over a decade of experience, Ankur's professional journey mirrors a deep commitment to nurturing growth, fostering innovation, and advocating for equal opportunities in education.

His diverse skill set spans academics, research, administration, public relations, business strategy, and brand management. Serving since 10 years as the Director of Operations at Swami Vivekanand Group of Institutes (SVGOI) in Chandigarh, Ankur orchestrates strategic initiatives to elevate academic excellence, manage admissions, and cultivate robust corporate relations.

His significant contributions to research, marked by numerous research publications and patents, emphasize his ardent dedication to fostering innovation and an unwavering commitment to continuous learning.

The narrative underscores Ankur's instrumental role in spearheading various initiatives under his leadership, aimed at equipping students with industry-relevant skills and creating an environment that encourages the transformation of innovative ideas into practical solutions. His commitment to scholarship programs, benefiting more than 1000 students each year, is a clear demonstration of his strong advocacy for equal opportunities in education, reaching even the most underprivileged regions.

Recognized as a sought-after motivational speaker, Ankur's influence extends beyond academia, as he shares insights and expertise at national and international conferences. His strategic acumen in business development, brand management, and market expansion has propelled the institute's growth, establishing it as a leader in the education sector.

Ankur has been honoured with over 10 prestigious awards at both national and international levels, acknowledging his dynamic leadership and substantial contributions to the education community. His visionary outlook is focused on cultivating a future where India restores its standing as a centre of wisdom and technical excellence, establishing a robust foundation for the nation's development.

ABOUT THE BOOK

"Empowering Youth: The Book "Swami Vivekananda Timeless Teachings for Today's Generation", brings young readers in contact with the life and Wisdom of Swami Vivekananda. In the first chapter, there is a brief insight into Vivekananda's dramatic life and youth-oriented appeal of his message both then and now.

The following chapters focus on important elements of Vivekananda's thought adapted to today youth. Topics such as fearlessness and confidence, seek for knowledge, self-discovery foster young people into becoming their own persons with a clear purpose of living. The book underlines the necessity of education and good habits encouraging readers to develop positive practices for personal development as well societal progress.

Its chapters aspire to youngsters to undertake selfless service and help society become healthier. The book also helps young people find a balance between worldly endeavors and religious goals, develop healthy connections in their lives and learn about mindful living along with meditation techniques to stay cool under pressure.

Social responsibility and civic engagement is emphasized, where more youth to actively participate in social issues. Patience, kindness and living in unity with nature is also highlighted as important concepts that facilitate overall personal happiness and societal well-being.

As a pragmatic handbook for today's youth, "Empowering Youth" uses simple language and easy to relate examples based on timeless wisdom from Swami Vivekananda guiding the readers towards handling the hurdles of contemporary life with confidence, purpose, and compassion.

(57) Abstract :
Embodiments of the present invention generally discloses a foldable disaster relief shelter (100). Disaster relief shelters play a vital role in large scale disasters and are an important part of disaster response and recovery. The foldable disaster relief shelter (100) is in triangular prism shape employs only three pivoted joints and is portable, deployable, stackable with ease and transportable in large quantities by only one vehicle and said shelter can be deployable quickly in less time with ease by few people and utilizes less resources without the need of any powered devices and complex tools.

(57) Abstract :
Embodiments of the present invention generally discloses an exercise walking machine (100) to generate electricity. The machine (100) comprises at least at least a base (102), wherein the base (102) is adapted to be fixed with frame 101, at least two handles (104,105), wherein the handles (104,105) are adapted to be pivoted with front bush (103) and the front bush (103) is adapted to be fixed with the frame (101), at least two foot supporting member (106,107), wherein the two supporting member (106,107) are adapted to be pivoted with end of the handles (104,105) respectively; at least two foot rest (108,109), wherein the two foot rest (108,109) are adapted to be fixed with the foot supporting member (106,107) respectively; at least two rear member (110,111), wherein the rear member (110,111) are adapted to be pivoted at one end with the foot supporting member (106,107) respectively and are adapted to be pivoted at another end with bush (114,115), wherein bush (114,115) are adapted to be coupled with the rear member (110,111); at least a rear bush (112), wherein the rear bush (112) is adapted to provide pivoted joint to bush (114,115); at least a generator (113), wherein the generator (113) is adapted to be fixed with the frame (101) and shaft of the generator (113) is adapted to be coupled with bush (114,115) in such a way that any rotation at the rear bush (112) generates electricity.

(57) Abstract :
Embodiments of the present invention generally discloses a flapping wing mechanism (100) for flying robot. Flying robots play a vital role in reconnaissance and situational awareness in combat field, search and rescue operations, biological and nuclear compromised sites and broadcasting and sports. The present invention employs a mechanism like scotch yoke and is simple, gearless, light weight, employs least number of components and can be developed at low cost easily with locally available materials.

(57) Abstract :
Embodiments of the present invention generally discloses savonius wind turbine tree (100). The tree (100) comprises turbines (103,106,109,112) which are in different planes and because they are also at equally distributed angle with each other they are safer for birds. The savonius wind turbine tree (100) is aesthetic as well as safe, structurally robust, efficient, simple, easily manufactureable, capture a major amount of wind, requires very less space for installation and could generate power at highways, express-ways, other major roads and also in residential area near homes.

(57) Abstract :
Embodiments of the present invention generally discloses a wheeled mobile robot (100). The robot (100) is utilized to navigate over challenging terrains and perform search and rescue mission as well as industrial inspection. A wheeled mobile robot (100) comprising: at least two frames (115,116), at least four motors (105,106,107,108,109), at least four wheels (101,102,103,104), wherein the wheel is adapted to be coupled with motor, which is adapted to be clamped with the frame; wherein motor (109) is adapted to be clamped with the frame (116) and shaft of the motor (109) is coupled with gear (110) which is further meshed with another gear (111) which is coupled with shaft (112) and the shaft (112) is adapted to be pivotally fixed with plate (114) and at other end coupled with plate (113) in such a way that when shaft of the motor (109) rotates in clockwise then the whole frame (115) rotates in anti-clockwise direction about axis of the shaft (112). The robot (100) employs camera and sensors to perform industrial inspection such as inside pipe.

(57) Abstract :
Embodiments of the present invention generally discloses robotic platform (100) with deployable solar panel. The robotic platform (100) is adapted to automatically maneuver near home, in balcony and garden of home to find suitable location to deploy solar panels (113,114,115,116,117,118) to harness solar energy and return back to home when sunsets. And this electrical energy is utilized to charge battery which is placed inside the robotic platform (100) which is utilized further either for household purpose or for driving car. The robotic platform (100) is aesthetic as well as safe, structurally robust, efficient, simple, easily manufactureable, capture a major amount of sunrays, which requires very less space for installation and could generate power in residential area near homes.

(57) Abstract :
Embodiments of the present invention generally discloses a automatic blackboard wiping device (100). An automatic blackboard wiping device (100), wherein said device includes an image recognition module and a control module; wherein said image recognition module includes camera (116) and said control module is interfaced with the camera (116) and actuates said motor (101), motor (103) and pump of vacuum chamber accordingly to wipe board (114) cleanly and suck the dust of the chalk to make the environment clean and breathable.

(57) Abstract :
Embodiments of the present invention generally discloses a vertical axis wind turbine (100). The turbine (100) is arranged in such a way that whenever gust of wind comes in contact with front part of blades (107, 108,109) then they rotate along with axis of hollowed cylinder (104). But whenever gust of wind comes in contact with rear part of the blades (107,108,109) then to eliminate air gust in opposing the rotation of the blades (107,108,109) then the blades (107,108,109) swings along with axis of bushes (110,112,114) respectively and thus increases the efficiency of whole system.

(57) Abstract :
Embodiments of the present invention generally discloses four wheeled omnidirectional mobile robot (100). The robot (100) comprises at least a frame (101), at least a motor (102), wherein the motor (102) is responsible to actuate the steering mechanism. Out of four wheels (104,105,106,107) the wheel (104) is adapted to be coupled with shaft of the motor (108), which is adapted to be fixed with the gear (112). The wheel (105) is adapted to be coupled with shaft of the motor (109), which is adapted to be fixed with the gear (121). The wheel (106) is adapted to be coupled with shaft of the motor (110), which is adapted to be fixed with the gear (115). The wheel (107) is adapted to be coupled with shaft of the motor (111), which is adapted to be fixed with the gear (118). The gears (112,113,114,115,116,117,118,119,120,121) are adapted to be assembled in such a way that when the gear (116) is rotated with shaft of the motor (102) in anti-clockwise direction then the gears (118,112) rotates in clockwise direction and the gears (121,115) rotates in anti-clockwise direction and thus robot (100) steers efficiently in tight spaces with high stability.

(57) Abstract :
Embodiments of the present invention discloses a leg mechanism (100) for walking robot (200). A leg mechanism comprising at least seven links, at least two motors wherein the motors are actuated in at least one of the following way or combination thereof: a) leg mechanism is adapted to be powered with at least one of two motors; b) leg mechanism is adapted to be powered with both motors ; c) leg mechanism is adapted to be powered with both motors but in different directions; d) leg mechanism is adapted to be powered with both motors but with different speed; wherein said leg mechanism is highly adaptable to negotiate over different terrains and perform various tasks. The leg mechanism is adapted to employ sensors to decide when to actuate the motors and is controllable by remote controller also.
